1. **[Tips To Start An Affiliate – Internet Business How To Get Up And Running And Make Money?](#)**

Congratulations on taking your first steps towards an exciting new career first off. One that can make you an extra income from home. A business that can eventually run itself on autopilot and earn you money. And a business that can earn you money while you sleep with customers from around the World.

That is the power of an internet home based business. But it's true power is freedom to do what you want, when you want, from anywhere in the World and all you need is an internet connection, a little determination, and the ability to learn all about affiliate marketing. Your first step is gonna be reading this blog post.

**What is affiliate marketing?** Affiliate marketing is selling other people's products, or services, in exchange for a commission. Billions of dollars are being made each year from affiliates from all over the World.

**Is affiliate marketing easy?** No there is a learning curve involved but you are taking your first steps by reading this post.

**Can you make money affiliate marketing?** Yes you can and a lot of it once you get good at it. Affiliate marketing is by no means a get rich quick scheme it is a business model that is used by almost every fortune 500 company and internet business online. It is a win, win, situation for everyone involved. You make money by referring a vendors product, or service. They make money from your efforts it is a no – brainer for both parties involved. Sound like something you would be interested in learning? Well read on!

## **Tips To Start An Affiliate Business How To Get Up And Running And Make Money Your Initial Steps**

**1. First things first to be a successful affiliate you are gonna need a website, or a blog to promote your affiliate products.** Is it a necessity? no. You can promote affiliate products without a blog, or a website but it will be a lot harder to build a long term income without one. Remember: We are eventually aiming for an autopilot income from your internet business. A blog, or a website can be the building blocks for your autopilot income.

**Tip:** You can start a blog, or website for about \$5 – \$10 dollars per month for pretty much every reputable webhost out there. I like Hostgator a lot but you can look around and find a webhost that suits your particular needs.

**2. Think of a niche to base your blog around** – A niche can be anything from affiliate marketing, [making money online](#), health @ wellness, sports, software, education, games, home @ garden, self help, travel, the list goes on and on....

**Tip:** Find a niche that you actually enjoy remember you are gonna be building an affiliate business that is gonna be around for years to come. The more enjoyable your niche is to you the more money you will earn from your online efforts. Why? It is simple you will put more time and effort into something that you actually enjoy doing.

**3. Domain name** – Once you find a niche you are gonna need a domain name for your blog, or website, that is directly related to your niche. Try to find a domain name that is available that has keywords related to whatever your blog, or website is based around. A good keyword phrase to use for your blog, or website domain name would be what an internet searcher would type into the search engine such as Google looking for a product, or service, that you are actively promoting.

**Example:** Learn how to start an affiliate business from home. Your blog is promoting affiliate products that [teach people how to make money online](#). A keyword rich domain name could be **startaffiliatebusiness.com**

**Tip:** This is just an example obviously your domain name will be unique to your niche. Target some keywords that are highly searched with low competition. Once you find a good keyword phrase see if you can buy that domain name with those keywords in it.

**You can check out domain names below:**

**[.CO Domains on sale now at GoDaddy.com!](#)**

**4. Find Affiliate Products To Promote** – Your affiliate business cannot make any money if you do not monetize it. Here are a few of my favorite **affiliate programs** where you can sign up for free and find some good products to promote.

a. [Clickbank marketplace](#) – Over 10,000 digital products for you to promote and make money. I love clickbank!

- b. [Rapbank](#) – Instant affiliate commissions but you must set up a free Paypal business account first.
- c. [Commission Junction](#) – Powerhouse affiliate marketing platform
- d. [Amazon](#) – Duh!
- e. [Plimus](#) – Pretty popular worth checking out

**Tip:** Look for affiliate products to promote that have a good sales page, are in demand, and have a good commission payout. When you refer a paying customer to a product, or service, you get paid. So the better the product, and the better it sells, the **more money** you will make with your new internet business.

**5. Unique Content** - Only write unique content that is not found anywhere else on the Internet. Unique content means that you wrote it not someone else where you just copied and pasted their content. This is an absolute no – no! Especially nowadays with Google slamming all the websites, and blogs that steal other peoples content and claim it as their own better known as content farms.

**Tip:** If you want your blog to be found in the search engines write the content yourself and you will rank higher eventually. If you want your **internet business** to fail copy and paste someone else’s content and take the easy way out. If you need to learn about search engine optimization and you are on a budget I highly recommend this [seo training course](#). You can check it out [here](#) it will help you out a lot! You also must start building backlinks to your website, or blog. If your not sure how to do this check out my [seo training course](#) it will explain everything to you in great detail.

**6. Driving Traffic** – Once you have a domain name, your own self hosted wordpress blog, or website, and you have monetized your site with some good affiliate products to promote. Now it is time to drive traffic to this bad boy and start **earning some money** from all your work!

\*\*\*\*\* [Check out this video on how to get traffic this will help speed up your learning curve](#) \*\*\*\*\*

\*\*\*\*\* [How to Get Visitors is a very popular ebook that reveals 15 Free Traffic Generating Techniques.](#) \*\*\*\*\*

- a. Blog commenting
- b. Forum posting
- c. Social networking- Twitter, and Facebook for example.
- d. Blogging
- e. SEO – Search engine optimization [learn it](#) so you can grab free visitors from the search engines. Very high quality traffic that converts into buyers.
- f. pay per click networks like Google adwords
- g. Start an email list. Capture your website, or blogs visitors and eventually turn them into paying customers.
- h. Article marketing
- I. Press releases
- J. Web 2.0 sites – [Hubpages.com](#) for example

These are all great ways to drive traffic to your new affiliate business so you can start to make some money.

**I hope you enjoyed my tips on how to get started with your very own internet marketing home based business. I hope it helps you out a lot and gets you up and running and making money**

fairly quickly. Who knows maybe one day you will be a super affiliate. P.S Just remember where you started lol. Good luck with your new online business.

## 2. Affiliate Internet Marketing Business How To Start One

### [Affiliate Internet Marketing Business How To Start One From Home?](#)

This post is gonna be a **To- Do list** on how you can get started with your very own internet marketing business from scratch. Affiliate marketing for you beginners out there reading this post is referring a vendor's product, or service in exchange for a commission. If someone clicks on your text link, or ad with your affiliate tracking code already embedded in it and buys that product, or service through your link you earn a commission. Pretty cut, and dry! Oh, and [affiliate marketing](#) is big business to say the least. Billions of dollars are exchanged each year between online businesses and their affiliates. Want your share of this lucrative pie?

### **Here Is How To Get Started With Your Very Own Internet – Affiliate Marketing Business. Follow These Steps:**

- Think of what you would like to sell, or promote online? What subject interests you? Then ask yourself is there a demand for these type of products? Is the competition fierce for this particular niche? If your a beginner try to find a niche that has the possibility to make you a lot of money but one that is not too competitive. Your a beginner get your feet wet before you compete with the big dogs.
- Sign up with a few affiliate programs and find some affiliate products related to whatever you want to start selling in, or your niche. My favorites are the [Clickbank marketplace](#), [Rapbank](#), [Shareasale](#), [Payspree](#), and [Commission Junction](#).
- Once you set up a free account at a few of these top affiliate programs you are gonna want to make a tracking link, or a hoplink. This is how you are gonna get paid so make sure you set it up correctly! With clickbank your hoplink will be your user name when you sign up for your free affiliate account. All you have to do is input your user name into the account nickname field after you click promote on the affiliate product that you want to advertise. The tracking i.d

field is optional but I do recommend it so you know where your clicks are coming from in your internet marketing campaigns.

- **For example:** You are advertising a link on your blog that you just started and a visitor clicks on your clickbank link that you have placed strategically on your blog. If you have the tracking id set up as **jaysblog** for example you will know that particular click came from your blog. If you are advertising on backpage for example a top classified site you can set the tracking i.d to backpagead so you know where your clicks are coming from. Get it? The tracking i.d's let you know which affiliate marketing campaigns are performing well and which one's to ditch.  
**Conclusion:** Use the tracking i.d whenever possible. I hope I explained it so you understand it.
- Find and buy a domain name. A domain name is **http://www.Facebook.com** for example or your internet address, or URL. You also want your domain name to include some good keywords related to whatever you are gonna be selling. **For example:** If your gonna be promoting **earn money online products** which I do not suggest you go into because the competition is fierce. You may want to buy a domain name with the keywords **earn money online products** in it if it is available. Check out <http://www.godaddy.com> and see if they have one that you are interested in and buy it after you do your keyword research. Find a domain name that has a keyword phrase related to whatever your blog, or website is trying to sell that has a lot of searches with low competition. This will take some research on your part but you are a smart cookie you can do it!
- Start a self hosted WordPress blog, or a website where you actually pay the small monthly fee for a company to host your site for you. I recommend [Hostgator](#) that is who I use and I am very happy with them. If you want to build a real affiliate – internet marketing business website hosting is a must. It is cheap about \$5 – \$ 10 bucks a month and you can pretty much do what you want without fear of breaking anybody else's rules. These are your rules on your paid site you call your own shots as long as you are not doing anything illegal you should be fine.
- Do not build your new affiliate internet marketing business on quicksand by going the cheap free hosting route such as Blogger.com. They are free for a reason you do not own them Google does and they can delete your blog for whatever reason they deem fit. Trust me I went this route when I was a beginner and did not know any better and I built my money site on blogger.com. Big mistake my blog was deleted and all my hard work was flushed down the virtual toilet. Not a good way to start my new affiliate marketing career at all. Lesson learned I moved on do not make the same mistakes I made as a beginner pay for your own hosting and build a real internet business that will last. You have been warned and like the saying goes you can drag a horse to water but you cannot make him drink. I hope your smart enough to listen to this advice!
- Only post 100% unique content on your website, or blog. Do not copy and paste someone else's content onto your website, or blog and claim it as your own. First off it is not cool at all in most cases, and secondly Google will not rank your website highly in the search engines which will kill your online business in the long run. After the last Google update Google slammed affiliate sites that had a large amount of duplicate content that were trying to game the search engines. This was a good thing for me, and all the other real affiliate – internet marketing blogs out there on the internet who work hard on our online businesses. **To recap:** Only post the content if you write it yourself on your blog, or website or you will be paying the piper eventually.
- Drive traffic to your affiliate offers so you can start to make some money from your online efforts.
- Learn seo so you can rank highly in the search engines for whatever you will be promoting as an affiliate marketer. I highly recommend you check out this seo course it will be a one time investment that will help you make money for years to come. A very good course for beginners who are new to seo. [You can check it out here!](#)

- **Free traffic techniques** – article marketing, classified ads, social networking, internet marketing forums such as the Warriorforum for example, social bookmarking, blog commenting, blog posting, press releases, pay per click, guest blog posting, j.v's with other internet marketers in your niche, adswaps, email marketing, the list goes on and on. These are free ways to drive targeted traffic to your blog, website, or affiliate offers.
- Once you start building your new affiliate internet marketing businesses traffic levels up and you are starting to make some money online you are gonna want to start an email list a.s.a.p. The money is in the email list so capture your casual website visitors and turn them into paying subscribers now, or down the line. Here is a link to get you started with the email marketing company I use for a [\\$1.00](#) for your first months service. **P.S.** this is the email company all the big dogs use online. They are known in the internet marketing community as the creme of the crop.
- Keep plugging away at your **affiliate internet marketing business** and realize you will not get rich overnight. Internet marketing takes a lot of work especially in the beginning. This is a business treat it as such and put in a little effort each and every day. Every blog post you make, every article that you post, every forum comment that you answer, every press release that you submit, every classified that you write, every affiliate program that you successfully promote, and make money with gets you one step closer to your ultimate goal. Financial freedom, and eventually an internet business that runs itself on autopilot 24 hours a day 7 days a week and collects money for you even while you sleep. How cool is that? See what a little hard work can do for your pocketbooks?
- What are you looking at! Get to work and start making your online dreams a reality no-one's going to do it for you.

### **Learn SEO Online Basic Training Course for Beginners**

We all want to earn more cash from our efforts on the internet. Targeting keywords that we can rank highly for from Google, Yahoo, and Bing that will make us money is a major step in being a success online. After all free seo traffic is better than paid seo traffic any day of the week.

But if your a beginner and new to seo in general you have no clue on how to accomplish this. Trust me, I remember those days years ago quite vividly. This blog post is dedicated to newbies who are struggling with the basics on [how to rank higher in the search engines](#) – so you guys, and girls, can start making some money from your blogs or websites.

### 3. Learn SEO Online Basic Training Course for Beginners To Get More Google @ SEO Traffic From The Search Engines. Your Internet Marketing Tips:

1. Insert the keywords you are targeting in your title tag and meta tag description. Very important! This will give you a big boost in Google for the keywords you are targeting, and the other major search engines.

2. Add anchor text in your website, or blogs content for a boost in the search engines. Anchor text are the keywords you are trying to rank highly for your blog post. For example: I am targeting **Learn SEO Online Basic Training Course for Beginners** so you can find this post in Google, Yahoo, or Bing and learn from it. If your a self hosted WordPress user all you have to do is click on the link button you should see an intact chain. Add the link of your choice for the affiliate program that you are promoting. In the title section add your anchor text for the search engines. For example: Your blog title or the keywords that you are trying to rank highly for your blog post. [The best seo training course for beginners to get more blog traffic](#). If you hover over that link with your mouse you will see the title appear. This is an example of anchor text.

**P.S** if you click the link a **great affiliate program** will popup that teaches you in depth more about seo that is geared towards beginners like you.

**Blog Commenting Tip:** If your doing any blog commenting which you should be doing periodically. Add the keywords you are trying to rank highly for in your blog in the title section of the blog posts that you are commenting on. Once they get approved by the blogger you have an outbound anchor tag that leads back to your blog for more **seo juice**. Just comment on blogs related to your niche, for targeted traffic, who will be more interested in buying what you have to offer.

**Beginners:** You do not want to comment on dog training blogs if your blog is about internet marketing @ making money online.

3. Do not link to bad neighborhoods link farms, or spam sites. Only link to trusted websites, or blogs with high traffic and a good pagerank 2 or better for starters. Feel free to comment on this blog for starters for a nice backlink.

4. Unique original content- Google killed a lot of blogs, and websites that were in business by posting other peoples content. It was called the Google farmer update and it was a good thing. It lowered the seo rankings for the sites who were cheating the system, or too lazy to come up with their own unique content. **Warning:** If you want free traffic from the search engines only post quality unique content. Google will reward you with free visitors for your online efforts.

**Tip:** You can read more about ranking highly in the search engines – and also [learn more online seo basic training tips for newbies here](#).

5. He, or she with the most quality backlinks wins the search engine optimization war. **Remember that.** Linkbuilding can be a slow, tedious process. Take it slow and link to quality sites. The more competitive your online niche is the more backlinks you will need to rank for competitive keyword phrases that you are chasing. If your niche is underwater basket weaving lol I am using this as an example. You will probably not need that many seo backlinks to dominate your niche. But on the other hand if your niche is like mine extremely competitive the internet marketing @ make money online niche you need a lot of backlinks from the search engines so you can rank highly for your blog posts etc....

**Seo Training Tip:** The higher you rank in the search engines the **more money you will earn online** – it's that simple. If your a beginner, and just starting out go after less competitive keyword phrases. You will have a better chance of ranking higher. Once your seo rankings get better, then you can chase the more competitive keyword phrases.

6. This is not related to seo but it will help you make more cash from your search engine optimization efforts. Start building a mailing list from the free traffic that you will be getting from the search engines this is where the real money is made online. Here is a link to get started for only a [\\$1.00 from aweber for your first month click here](#). Ask any top internet marketer and they will answer the same. The money is in the email list so what the hell are you waiting for? If your searching for ways to **earn money online** an email list should be your top priority.

#### 4. Learn How To Make Money On The Internet For Dummies What Works?

Don't Be A Dummy Like These 2 Drunk Bums In This Picture Click Here To Start Your Money Making Journey With My Recommended Training Course!

#### [Learn How To Make Money On The Internet For Dummies What Works?](#)

There is so much information floating around out there, if your a **beginner** to **making money on the internet** it can baffle your mind, or down right confuse the hell out of you. You want answers on what works? And what the hell is just downright wasting your time? These are scams, or time wasters as I like to call them.

Well, I have put together a list of what to do if you want to cut out all the bullshit and start putting together a profitable money making machine that can earn you money on autopilot even while you sleep.

Owning a blog, or website, is like having internet real estate. With a little hard work you can own your own park place. If you decide to just leave it there and put no time @ effort into your **online** real estate such as blog, or website maintenance which involves building backlinks, and adding unique content on a semi regular basis. You also must remember the **internet marketing** aspect of **making money** with your blog, or website, such as social networking sites like Twitter, and Facebook.

Create a Facebook fanpage, participate in online forums related to your niche, video marketing, comment on blogs related to your website, or blogs niche for starters. If you do not market your blog, or website you may as well throw in the towel. Instead of parkplace you will have the equivalent of mediterranean avenue or baltic avenue in monopoly. *Not the kind of internet real estate that you want to have to pull in the **big money online**. The online money will not magically appear by the website fairy. It's gonna take some hard work, and effort on your part to make a [good income on the internet](#).*

### ***Don't Be A Dummy Follow These Proven Steps To Start Cashing In On The Internet On A Regular Basis***

**1. Don't Be A Dummy** – Start a real internet business by researching a niche you have some interest in @ at the same time can potentially earn you a nice amount of cash at the same time. It is far easier to succeed if you have an actual interest, or a passion, in your website, or blogs main area of focus. P.S. Do not forget to update your website often with unique original content. The latest Google farmer update penalized 1,000's of sites on the internet with unoriginal copied content. Be original and write your own blog posts Google will reward you with higher search engine rankings.

**2. Don't Be A Dummy** – Start a self hosted wordpress blog. Let me sink this point into your head or your **internet business** will sink faster than the Titanic. Pay for website hosting and buy your own domain name. A dummy will invest all his or her time and energy into a blog that is essentially owned by someone else. If you are using a free hosted blogging platform like blogger, or wordpress.com you are setting yourself up for internet failure right off the bat. Don't come crying to me when one day your blog gets deleted because you violated one of their ever changing terms of service. (Which can happen for pretty much anything trust me I am speaking from experience when I myself was just a beginner to the **internet and earning money online**). Smart affiliate marketers and internet marketers in general only use free hosted blogging platforms to mess around with or for backlinks to their main money blogs.

**3. Don't Be A Dummy** – Learn as much as you can about search engine optimization. Smart internet @ affiliate marketers know that the best kind of traffic that you can possibly have to your website, or blog is free targeted search engine traffic. These are actual people coming directly from the major search engines that are looking for what you have to offer. This traffic converts into you **making more money** from your internet business. **Keyword tip:** Target keywords that are buying keywords and try to rank highly for them to get the most money from your website, or blogs traffic.

**4. Don't Be A Dummy** – Start an email list a.s.a.p. I waited a couple years to get mine started which was a big mistake when I finally realized half the battle of making money on the internet is building a responsive email list from your blog, or websites traffic. The bigger and better your email list is the more money you will earn online from your internet marketing efforts period! **Internet Marketing Tip:** Once you reach about 500 email subscribers starting doing adswaps with other internet marketers to grow your list a lot faster this will also make you some great **extra cash** in the process.

**5. Don't Be A Dummy** – If your trying to [make money online](#) from affiliate marketing. Which in a nutshell is **making money** from recommending a product, or service to anyone on the **internet** in exchange for a commission. If they buy that particular product, or service through your affiliate link you will earn a commission and make money. But, to be successful you need to learn all you can about affiliate marketing. Be a student of the trade. The more you learn, the more your gonna **earn** period! The best Dr's do not become the best overnight. It takes years and years of training for them to master their chosen trade. Think the same way with your affiliate marketing career – only the learning curve is a lot shorter. **Learn while your earning on the internet**. Always brushen up on your internet marketing skills so you can put yourself in the best position possible to make the **most amount of money** from your **online business** as possible.

*Here Are A Few Of The Top Affiliate Programs You Can Make Money With On The Internet:*

1. **Commission Junction** – <http://www.cj.com/>
2. **Linkshare** – <http://www.linkshare.com>
3. **Clickbank** – <http://www.clickbank.com>
4. **Share-A-Sale** <http://www.shareasale.com>
5. **Amazon** - <http://www.amazon.com>

Congratulations, you are on your way graduating from a dummy into a full pledged internet marketing machine. **P.S Your not a dummy anymore either..... Dummy comments are all in good fun!**

4. **Facebook** – Need I say more? Did you guys see the social network? Awesome movie, and awesome

site. Internet marketing tip: Increase your website traffic ( visitors ) By building a Facebook fanpage.

**5. Tagged.com** – Huge social networking site. Internet marketing tip: After creating your Tagged account go to the match app and click yes on everybody. A lot of these people will request you to be their friend. You will add a lot of friends this way

**6. Myspace.com** - The original high powered social networking site.

**7. Myyearbook.com** - Started by a few high school kids now worth millions.

**8. Twitter.com** – Build up your Twitter followers and tweet about your website to increase your website traffic.

**9. Craigslist Forum** – Secret way to increase your website traffic. Most people do not even know that Craigslist has a forum. Works real well!

**10. Craigslist Classifieds** – Post a few classifieds now and then advertising your website, or blog.

**11. U.S.freeads** – If you have a premium membership which is \$9.99 month you can write unlimited, attractive classified ads that rank well in the search engines. Definitely worth the money.

**12. Ezinearticles.com** – Write articles related to your website, or blog to increase your websites visitors. This directory is the biggest in the article marketing World.

**13. Articlesbase.com** – Hot on the heels of ezinearticles.com is articlesbase.com they get a lot of traffic also. Quick Note: Be sure to write 100% original content when submitting an article nowadays. Due to the changes in Googles search algorithm they are deleting duplicate content from their systems. You can read more about it in my blog post below.

**14. Goarticles.com** – Another high powered article directory for you to submit some articles too.

**15. Articedashboard.com** – Another decent article directory but the top 3 above are the best 3 if your looking for popular article directories to submit your articles too.

**16. Prlog.org** – My favorite press release site to advertise your website, or blog for a nice increase in traffic. Internet marketing tip: You can blatantly advertise your website, or blog choose your keywords wisely they rank well in the search engines.

**17. Salesspider.com** – Business directory and classified site that gets a lot of traffic from business professionals. Definitely grab a free account here.

**18. Betternetworker.com** – Good site that gets a lot of traffic geared towards business professionals, internet marketers, and affiliate marketers. I get a good amount of website visitors from better networker by submitting articles, and participating in their online forum.

**19. Blackhatforum.com** – Secret seo strategies some may disagree with but they do get a lot of traffic and it is worth joining and looking around this forum. At the very least you will learn a few new things.

**20. Hubpages.com** – Awesome traffic source! You can monetize your hubs 4 different ways to make money. Through affiliate programs, adsense, kontera, and amazon ads. You are allowed up too 2 different affiliate links on each hub that you write but they must not lead to the same site. Easy enough right? They rank extremely high in the search engines. I have earned quite a bit of money online through Hubpages alone. Check them out! This is a must have tool to increase your website, or blogs traffic levels.

**21. Problogger.net** – A good blog for you to comment on various posts for a backlink and an increase in your websites traffic levels. Do not spam make intelligent, relevant comments and your website will be rewarded properly.

**22. Johnchow.com** – Very high trafficed blog and he updates it quite often. Same applies here. Make relevant intelligent comments on John’s blog with a backlink to your website in your comments and you will be rewarded with an increase in traffic.

**23. Shoemoney.com** – Very high traffic blog this guy has made millions online so his blog is a great place to learn about internet marketing, affiliate marketing, and tons of other cool stuff. Make a comment for a backlink pointing to your website, or blog for some extra website visitors.

**24. Zacjohnson.com** – Affiliate marketing tips from super affiliate zac Johnson. This is one of my favorite blogs his blogs design is top notch, and the information he provided to his blogs visitors is even better. Zacjohnson.com is a must visit if your gonna be serious about learning internet marketing.

**25. Jaysonlinereviews.com** – You didn’t think I was gonna forget about my blog did you? My blog is a great blog to learn all about affiliate marketing, internet marketing, product reviews, affiliate programs, and ways to earn more money online. I update it at least 3 times a week with fresh unique content. So stop in and comment on one of my posts for a nice increase in traffic to your website, or blog.

**26. Courtneytuttle.com** – **She has a nice blog with some good information related to internet marketing.**

**27. buzzblogger.com - Kim Roach** is the webmaster of this blog and she has good traffic levels along with some great website traffic tips she also runs a traffic site called traffic dashboard you can check it out here if your interested in some more ways to increase your website visitors. **The ‘Traffic Dashboard’** is a one-of-a-kind traffic platform that shows you how to point-and-click your way to increased traffic.

**28. entrepreneursjourney.com** - Down-To-Earth Advice For Bloggers and Internet Marketers. Run by top internet marketer Yaro Starak another great internet marketing blog with some useful information.

**29. Smartbloggerz.com**- Blogging and making money online tips for more success. Another good blog with some good blog posts for you to comment on for an increase in traffic to your website, or blog.

**30. Businessweek.com** - Good traffic source that teaches you how to get started with your small business.

**31. Techcrunch.com** - The name says it all. A good traffic source and backlink for your blog, or website.

**32. Sparkplugging.com** – The internet marketing eggspert. Work at home resource for internet marketing home based business entrepreneurs.

**33. Wahm.com** - Work at home moms – they get a lot of traffic so take advantage of it they have a work at home forum for moms, a blog, and an online directory. Very cool website.

**34. Yedda.com** - Great traffic source a question and answer site that can bring your website, or blog a lot of visitors. Take advantage of it!

**35. Yahooanswers.com** - The most popular question and answer site online and it is a great traffic source if you play by the rules. Answer questions related to your website, or blogs niche for some targeted traffic. You can make a profile on Yahoo answers and include a bio about your website. When you get up to level 2 after answering a certain amount of questions. All the links to your website become active and clickable. They can also visit your Yahoo answers profile where you will have a backlink to your website, or blog. This is a great way to increase your sites visitors.

**36. reviewme.com** - A cool site where you can make money by reviewing, and promoting products, and drive buzz, and traffic to your site.

- 37. startupnation.com** - made for entrepreneurs by internet marketing entrepreneurs. Some good online business tips. They also have a forum, and a blog, so you can participate and drive targeted traffic to your own website, or blog. Plus many more options you will have to check it out to find out more info.
- 38. huffingtonpost.com** - breaking news and opinions on this major website. They get tons of traffic so make a profile and start commenting on some posts and see your websites visitors rise.
- 39. 2createawebsite.com** - Lisa Irby runs this website. She is also the forum owner of websitebabble.com which I mentioned above. Her website gets a lot of traffic so make sure to stop in and comment on a few of her posts on this blog. She also has very good information on this blog that has a lot to do with website creation etc....
- 40. Linkreferral.com** - Free website advertising. You rate other peoples blogs and websites with this website. In return you earn credits for them to review and check out your website, or blog. Sort of like a traffic exchange but it does produce a little better results. Worth it to check out!
- 41. Youtube** - One of my favorite ways to drive targeted traffic to my blogs, and websites. Youtube gets more traffic than Yahoo, and Bing combined. I bet you didn't know that? So take advantage of it and submit some videos promoting your website, or blog. **Internet marketing tip:** Videos go viral, and can be shared the same way articles can. Whenever you submit a video to youtube when you are writing your videos description in the box provided make sure to include a link to your website first. For example my blog is about earning money online, and internet marketing. If I am submitting a video promoting my blog in the description box. I would leave first. **Visit:** <http://www.jaysonlinereviews.com> make money online, great internet marketing strategies, etc... etc... You get the point the link is then clickable when put in this format. And if the video is shared somewhere else you still have that link to your website, or blog. This is a great traffic strategy for targeted traffic to your website use it!
- 42. Chrisfarrell.com** - Another good website this guy knows his stuff. He also runs a membership site teaching people all about internet marketing, and affiliate marketing. This website also gets a lot of traffic.
- 43. Safeswaps.com** - This is one of my personal favorite traffic sources online. If you are trying to build up your email list this is a must join. The cost of a safeswaps membership is \$15.00 a month which is chump change compared to the money I make by being a member. Not too mention all the free website traffic that I can handle.
- 44. Digitalpointforums** - This is a very high traffic forum for you to participate in - where you will see a nice increase in your websites traffic through your forum signature link. You make a forum signature link for all forums that you join online that will be a link to your website, or blog for all you beginners reading this!
- 45. RSS Feeds** - If your a blogger just submitting your blogs rss feed to the major rss directories will increase your website traffic.
- 46. Squidoo.com** - Create a squidoo lens promoting your website, or blog. Many internet marketers swear by Squidoo. I swear by Hubpages. But too each their own, we all have our own opinions. But one thing we can both agree on is that Squidoo is a great traffic source.
- 47. Netprofitstoday.com** - Run by super affiliate marketer Rosalind Gardner. She has made millions online throughout her internet marketing career and she runs a blog that can point you in that same direction. Rosalind Gardner is a very well respected marketer in the IM community. Her blog is top notch so check it out!

- 48. Fiverr.com** - Everything you would do to make \$5 bucks. You can set up gigs for yourself, or buy gigs. It is also very useful for increasing your websites traffic levels. Fivver is used by a lot of top internet marketers - myself included.
- 49. Social Bookmarking Sites** - Make sure you submit your blog, or website to the top social bookmarking sites. Digg.com, Google bookmarks, Yahoo bookmarks, Msn Bookmarks, Stumbleupon, Delicious, Furl, Reddit, etc... etc...
- 50. Cool site of the day** – <http://www.coolsiteoftheday.com> - Find cool sites and submit your site to *Cool Site of the Day*, a free and paid directory featuring website marketing and search engine optimization strategies. Submit your website for free and one day be featured as the cool site of the day for tons of free traffic.
- 51. Backpage.com** - Posting classifieds is a great **free way to increase your traffic** to your affiliate offers, products, blogs, and websites. Backpage is very popular – it is not as popular as Craigslist obviously but it does get a lot of traffic each and every day. **Tip:** Post a classified in multiple cities they are usually very cheap and are a great return on investment if you choose the proper category. You can direct traffic to your favorite affiliate offer, website, or blog. Highly recommended!
- 52. Winning The Web** -<http://www.winningtheweb.com/> - Nice blog that talks about various internet marketing strategies.
- 53. Smartbloggers** - <http://www.smartbloggerz.com/> Nice blog that talks about various internet marketing strategies.
- 54. 5 Star Affiliate Programs** -<http://affiliate-blogs.5staraffiliateprograms.com/> Talks all about affiliate programs, internet marketing, and making money online.
- 55. Toprankblog**- <http://www.toprankblog.com/> Blog tips to help you make more money blogging. Very high traffic internet marketing blog that will teach you how to make more money affiliate marketing, internet marketing, and their specialty blogging. **Tip:** Comment on a few posts for an increase in traffic and visitors.
- 56. Ineedhits** -<http://blog.ineedhits.com/>- This blog gets a lot of traffic. With an alexa ranking of 6,864 comment on a few posts for some free targeted traffic especially if your site has anything to do with internet marketing, or making money online.
- 57. Thethirtydaychallenge** -<http://www.thirtydaychallenge.com/blog/>- This guy teaches you everything from internet marketing, how to be more productive online, and most importantly how to get more traffic to your website, blog, or affiliate offers. The same thing applies here comment on a few of his posts for some nice backlinks, and an increase in your sites visitors.
- 58. Andybeard** - <http://andybeard.eu/> Internet marketing, lead acquisition, online business strategies, and social media topica are discussed on this blog. Good traffic levels.
- 59. Affiliatetip** -<http://blog.affiliatetip.com/>- Affiliate marketing blog by internet marketer Shawn Collins. Good alexa rank and traffic levels.

**60. Search Engine Optimization Most Important Of Them All** - If you do not know anything about it at least learn the basics. I offer a few recommended courses on my blog <http://www.jaysonlinereviews.com> that cover **SEO** in great detail. This is long lasting **free traffic** from the search engines which is the best kind of traffic that your website, or blog can get. If your website is optimized well you will make a lot of money assuming you are selling some decent products. Your website will see a major increase in targeted visitors all on autopilot – just by taking the time to learn how to optimize your website for the search engines. Internet marketing seo tip -Find some keywords related to whatever you are selling, use Googles free keyword research tool, and look for keywords with low competition, that are highly searched. Sprinkle these keywords into your website, or blogs content. This is just a starting point there is a lot more to learn with seo so start doing your research. But there is nothing better than free targeted buyers visiting your website because they found your website through the search engines.

**\*\*\*\*\* Cool website you guys have to check out\*\*\*\*\*** it is called **widgetcow.com** milking the web they have all kinds of free cool widgets for your websites, or blogs that I love. A must see site with some very useful widgets for all internet marketers.

**Feel free to link to this blog and share this post with a friend who is struggling with their traffic levels. Increase Website Traffic ( visitors ) 60 Free Proven Strategies That Work Must Read!**

## 6. How I Make Money Blogging And You Can Too In 2011?

[Get Auto Blog Blueprint 3.0 Now... Click Here!](#)

## **How I Make Money Blogging And You Can Too In 2011? A Few Tips To Succeed In 2011.**

Blogging can be very fun, and lucrative. And yes you can make a lot of money blogging! But the big money will not come overnight. Sure you can make a few bucks here and there – and pay off some bills relatively quickly. But if you want to build a long term income from blogging you will need these inner qualities.

- 1. Motivation** – Keep at it and you will eventually succeed in 2011, and well beyond. You can't keep a good man, or Woman down right?
- 2. Laziness** – Please do not be lazy if you want to be a successful long term, profitable blogger. You will need to work on your blog continually by updating your posts and thinking of new ways to better monetize your blog. If your lazy go back to bed blogging is not for you. Only motivated people who want to better themselves should be bloggers! If you hate writing blogging is not for you either!
- 3. Learning** – If you are thinking about starting a blog, or have a blog already you are gonna want to know how to make money with your blog right? This is where learning all aspects of internet, and affiliate marketing come into play. Internet marketing is a trade, and to get good at your chosen trade you need to keep learning new techniques and ways to drive laser targeted traffic to your blog.

### **My Favorite Techniques To Drive Traffic To My Blog Are:**

- 1. Adding Unique Valuable Content To My Blog.** The internet is based around content and that is where your blog comes into play – by adding unique valuable content to your blog you will drive laser targeted traffic from the major search engines. With Googles new change in their algorithm this is even more true. Warning: Do it right, and do not copy and paste other peoples content on your blog. Your blog will go no-where fast! Write unique posts for your blog that you wrote from scratch yourself. Do not fight the 800 pound Gorilla ( Google ) if you do you will lose every time. If you play nicely, and play by Googles rules, you will **make money from your blog** for a long time. **Conclusion:** Add only unique content to your blog and you will rise in the search engines rankings and **make more money.**
- 2. Forum Marketing** - Warriorforum, and myworkathomesuccess.com are my two favorite internet marketing forums.
- 3. Submitting Youtube Videos**
- 4. Submitting Press Releases**
- 5. Hubpages**
- 6. Ehow**
- 7. Blog Commenting On Related Sites ( Very Effective )**
- 8. Article marketing** - If your new to blogging you are gonna want to do this for a while to build up some backlinks. I myself do not do much article marketing anymore, only because my blog is established, and in my opinion it is not as effective as it once was. I still do recommend Ehow.com and hubpages these are the only 2 I will submit to anymore.
- 9. Joint Venture Partnerships** - My favorite traffic generation technique for my blog. I team up with other internet marketers and do some adswaps to drive laser targeted traffic to my blog, and drive more sales to my affiliate offers. What this means to you? Start building an email list – and some of your

blog visitors will opt-in to your email list. This will make your blog a lot of money once your list gets into the thousands. The money is in the list bloggers!

**10. Classified Ads** – Still work pretty well. I only submit to the major classified sites. Craigslist, Kijiji, U.Sfreads.

**11. SEO – Search engine optimization** – Learn how to get free traffic from the search engines with your blogs content. Free search engine traffic is the best kind of traffic of all. These people are actually searching for what you have to offer which means more money for your blog.

### **What I Do To Make Money Blogging And You Can Too In 2011?**

**1. My blog is a business, so I treat it as such. I only use a self hosted WordPress blog-** For you beginners who are new to blogging pay close attention to what I am about to say. If you plan on spending a lot of time blogging and generating a full time income one day do not be cheap! Pay the \$ 5 or \$10 dollars a month for webhosting and buy your own domain name. The free blogging platforms like Blogger are free for a reason you don't control them Google does. Remember that! I had a few blogs deleted for violating their terms of service a few years back when I did not know any better. Blogger's terms of service are always changing so they can delete all your hard work at the push of a button. Amateurs use blogger as their main money sites. Real bloggers have self hosted WordPress blogs and they control their blogs content no one else! Protect yourselves. You have been warned!

**2. Pick quality products to promote as an affiliate on your blog.** You have to pick the right products to promote on your blog if you're an affiliate marketer, No one is gonna pay you money if you're selling crap to them. Pick affiliate products for your blog that actually work, and ones that are gonna provide good value for your blog readers. You want people to actually like you, and become repeat visitors on your blog right? You betcha! This is where you will **make money blogging** by providing valuable content, and valuable products to promote to your visitors.

**2.** I provide valuable content for my blog readers which has them coming back. Help your readers succeed, and they will help you succeed even more.

### **3. I monetize my blog 4 different ways.**

**1.** Google adsense ads

**2.** Affiliate Marketing Recommendations – Banners, and links related to whatever I am talking about.

**3.** I collect email addresses by putting an opt-in form on the right hand side of my blog and using an Aweber lightbox popover giving away a bunch of cool books 16 in all free for all my blog visitors. I also have a squeeze page where I capture email addresses. Don't be afraid to sign up for another marketer's email list. You can get a lot of cool ideas from them to use with your own blog, or online business, and get a bunch of cool freebies to boot. You can always unsubscribe whenever you want.

**4.** I sell banner ads on the right hand side of my blog. Other online businesses, or internet marketers will pay you to advertise their business on your blog in the form of a banner, or a text link that links to their blog, or product. The more traffic your blog has the more money you can charge them for advertising space.

**This is how I make money blogging? How do you make money blogging? Your comments are appreciated below!**

**To Your Online Success, Jay!**

## 7. Rapbank Affiliate Program Review

---

### Click Banner Above To Sign Up For Your Free Rapbank Account And Get Paid Instant Affiliate Commissions

I am gonna start this blog post off right and get straight to the point. I love the Rapbank marketplace. No beating around the bush for me. They are officially my favorite place to find all kinds of good material to buy, and review. And if I find the product helpful, and of value, I recommend that product to my blog readers.

Here is why I like the Rapbank marketplace so well, and why I am doing this review. First off payments are made instantly to your Paypal business account after a sale is made. It does not get any better than instant affiliate commissions.

**Secondly:** There is a ton of quality products in many different niches that you can promote as an affiliate on your blog, or website, and make some nice extra money online doing so.

**Third:** This is a great reason. If your familiar with the Clickbank marketplace. They are the biggest digital marketplace for affiliates in the World. They have tens of thousands of digital products for you to choose from to promote to your blog, website, or email list. They are another great affiliate program and I also recommend them highly. Clickbank always pays on time, and they are very reliable. My biggest downfalls with the Clickbank marketplace from an affiliates standpoint is people can buy from their own affiliate links – which I do not like at all.

Secondly, if your in the internet marketing niche everyone knows about Clickbanks 60 day return policy so the refunds can be pretty high. And believe me internet marketers take advantage of this generous return policy. They can even like the product they bought and just return it because they know they can get their money back. It is a very unethical practice that takes money out of the hard working affiliates promoting these products. **Dont get me wrong I love the Clickbank marketplace, and you can make some great money promoting their products. But these two reasons are my biggest drawbacks about Clickbank.**

Not so with Rapbank! Want to know why? Ever try buying from yourself through paypal? I can tell you from experience you can't! What does this mean for you? More money in your pockets, and far less returns. I have roughly 100 – 200 sales of internet marketing products through Rapbank. These are products that I have bought myself, if I like them I promote them to my blog. Guess how many returns I have had with these products? Only 1. I am not kidding that is it just 1! And that 1 was from someone who did not click on the link to get the product he ordered. I just looked up my stats **122 sales and 1 return.** Try getting these results with any other affiliate program out there.

**Conclusion:** Very few returns, instant commissions for all affiliates with a Paypal business account, and you cannot buy through your own affiliate links. Does it really get any better than this if your an **affiliate marketer?** Rapbank is definitely my favorite **affiliate program** out there at the moment. You guys, and Girls can sign up for free by clicking on the Rapbank banner above.

**Quick Note: Make sure you sign up for a Paypal business account so you can get paid instant commissions through Rapbank. A business account is free with Paypal it will not cost you a thing. Go sign up, and let me know your results with Rapbank. I hope you enjoyed this review of the Rapbank instant commission affiliate network.**

To Your Online Success, Jay!

## 8. Best SEO Strategy To Increase Free Search Engine Traffic

**Need More  
Website Traffic?**

**[Click Here To Get Free  
Traffic To ANY Website](#)**

**Instant Traffic Shortcuts Easily generate free traffic to any website. New 'Unreleased' step-by-step video training shows everything you need to know to get traffic FAST. Check out the sales page for results of students getting Google Page #1 in less than 24 hours. Click Banner To Watch Video!**

## **Best SEO Strategy To Increase Free Search Engine Traffic To Your Website, Or Blog.**

We all know that we need traffic, and lots of it to **make a lot of money online** right? This is a no – brainer of course we do. The more traffic we get from the **search engines for free** the better right? You want your website, or blog to be seen by the billions of online searchers so you can make money. But the problem most of us run into is how do we get those **top seo listings** for **increased traffic** from the search engines?

### **Here Are Some Basic SEO Strategies For Beginners:**

1. We need to **learn seo** so we can get our websites, or blogs to **rank** highly for the keywords that we are targeting first off.
2. We need to **optimize** our blog, or websites content for the keywords that we are targeting. This is what are potential customers searching Google are gonna use to find you in the **search engines** your chosen keywords so choose wisely! If you want **free search engine traffic** from Google, Yahoo, Or Bing. Choose some keyword phrases 4-5 I would say for starters that are related to your website, or blog. You can research free keyword phrases using the Google adwords keyword research tool. Enter a keyword phrase that is related to your site that a potential Googler might enter in the search bar. Google adwords keyword research tool will then tell you how many times a month that particular keyword phrase is searched.

You can also narrow it down by using the exact search function ( **This Is A Great Seo Strategy**). This will tell you how many times a month exactly that particular keyword phrase is searched. Pretty cool huh? And free so take advantage of it for **free search engine traffic ideas**. Think high searches, and low competition for your potential keyword phrases. Your **strategy** is to find keywords that you can actually **rank** on the first page of Google for. You want to be on the first page because that is where all the **free search engine traffic** is. Rarely does an online searcher ever go past the first few pages when performing an online search.

3. Optimize the meta tags with your keyword phrases. The meta tags are basically the title of your website, or blog and is the first thing a person sees when visiting. My meta tags for my blog are below this will give you a general idea of what your meta tags are. They are very important make sure you put meta tags in your site:

[\\$\\$\\$\\$\\$ An Entrepreneurs Journey To Earn You More Passive Income Online – Internet Marketing Lessons, Tips, Product Reviews. \\$\\$\\$\\$\\$](#)

4. Building Quality backlinks is probably the **best seo strategy** of them all, but they all are very important. Link to sites with high page rank, and a lot of traffic from the search engines. Or in general for that matter, and if they are authority sites even better. **Building backlinks** is time consuming, so start off slow, it is a long process but when done right you will slowly start to see your website, or **blogs traffic increasing**. Just be patient, and persistent, good things come to those who wait and work hard. You are gonna want to link to sites related to your niche if possible. But any good link will do. There is a saying in the **seo industry** he, or she, with the **best** backlinks usually wins the seo war. If you want to outsource your link building that is also a viable option. I use the site Fivver you can find some pretty good gigs on **Fivver** related to **seo** and all the **seo** gigs only cost \$5.00 so it is pretty cheap.

5. This is **seo** in a nutshell for you **beginners** out there who are new to seo, and **increasing your free search engine traffic**. Remember the best kind of traffic is free traffic. If it comes from the search engines it is the best traffic on the planet. These people are actively searching for what you have to offer so do your seo right so they can find you and you can make a lot of money for your online efforts!

**SEO Course Recommendation:** I am just scratching the surface, there is a lot more **strategies** you need to know when it comes to the search engines . To really dig into **seo** and really get a good grasp on it I recommend this **seo course** to all my readers who are serious about getting more **free search engine traffic**. This is a business treat it as such.

Anyway I bought this \$10 dollar **seo course** a while back to brushen up on my skills a little. It was excellent, I enjoyed it so much, and I learned so much from this **seo course**, that I decided to also promote it as an affiliate. To date I have sold almost 100 copies of this **seo strategies course** with only 1 refund. And that 1 refund was from a customer that hit the wrong button and did not receive the download. A human error, no biggie shit happens. I promptly issued him a refund to resolve the issue. So 99 sales, and only 1 refund, and raving testimonials about this products quality. The best part about this **seo course** is you can promote it as an affiliate, make some **passive income** by promoting this seo strategy course, after you are done learning from it. It is a win – win for everyone. And trust me, you are gonna want to promote this seo course. It really is that good, and it sells itself. **You can pick up your copy by clicking on the banner directly below.**

## **9. Affiliate Marketing And Clickbank For Dummies**

---

**The Best Clickbank Program For Dummies Click Picture**

## [Affiliate Marketing And Clickbank For Dummies](#)

### **( Take Dummy Comments All In Good Fun I Know Your Smart)**

You probably strolling along the Internet looking for a legitimate way to earn some extra money from home. You have also probably heard about the affiliate marketing business model, and how it could make you a few bucks to pay off some bills? All this is true and more. Online affiliate marketing is a multi – billion dollar yearly business. Want to get in on the action? Let me walk you through the basics of affiliate marketing, Clickbank, and how to turn your free time into some cold hard cash. Buckle up, sit tight, and prepare for the coolest ride of your life.

**What is affiliate marketing exactly?** A form of marketing where individuals promote a business in exchange for either a percentage of the sales they generate or a specified amount for each lead generated.

**In Dummy Terms Translation:** Promote an affiliate product. Customer buys that product through your affiliate link, or banner. You earn a commission. You can also get paid just for directing traffic to a vendors website if you choose this option this is called cost per lead. Its your life the choice is yours! You can generate affiliate sales in any number of ways.

**Through Classified Ads You Place.** Think Craigslist, and Backpage these are 2 great places for dummies to start. If you have not read the bum marketing method by Travis Sago Google it fast. The bum marketing method is free and its a great place for dummies to start learning the basics of affiliate marketing.

**Through Your Blog, Or Website:** Once you get past the initial dummy phase of affiliate marketing you are definitely gonna want to start your own affiliate marketing blog, or website. It is not mandatory but highly recommended. This way you can control your content and your affiliate income will increase with proper ground work on your part.

I recommend a self hosted WordPress blog for various reasons for affiliates if you are planning on making this your one and only money site. If your a dummy you use free hosted platforms like Blogger for your money site. Why wouldn't you? Only a dummy would let Google control there blog, all there hard work, and can delete your blog for any reason they seem fit. A smart affiliate wouldn't do that would they? I think not!

**( Authors Note )** Affiliate marketing is not a get rich quick scheme it is a proven business model that is gonna take some work on your part. If your lazy and think that money grows on tree's go back to playing your Xbox and stop reading this blog post. Affiliate marketing is not for you! Only the strong survive, if your lazy and weak minded you will get chewed up and spit out in the long run. That Xbox is probably sounding better and better to you ha? Lol...

Affiliate marketing is not that hard in fact it is one of the cheapest start up businesses you can run from home. In fact you can actually run it for free in the beginning if you choose too. Once you get better at it and start making a few sales then you can pay for webhosting etc... very cheap only \$5 to \$10 dollars a month for you dummies, and cheapskates out there. Remember affiliate marketing is a legitimate online business treat it as such. There will be some costs down the road if you want to make the real big money one day, be prepared.

### **Ok So What The Heck Is Clickbank? And How Can Clickbank Make A Dummy Like Me Some Big Fat Affiliate Commission Checks?**

Clickbank is an online affiliate marketplace where you can sign up for free to be an affiliate. Clickbank has over 10,000 digital products for you to find something to promote and earn some money. They have so many products even a dummy like you should be able to find something to put your new found

Internet marketing skills to the test. If you sign up for a free Clickbank account your no dummy your a smart affiliate.

**Why Should I Sign Up For A Free Clickbank Account?** Its simple, Clickbank can fill your affiliate account with some big money. But you must be motivated, willing to learn affiliate marketing, and willing to work hard to get your share of the big Clickbank pie. Clickbank only deals with digital products. Did I mention you can make up to 75% commissions on a ton of products in the Clickbank marketplace?

**What Are Digital Products For Dummies?** What is the Internet based around? If you guessed information, than give yourself a big fat pat on the back, you earned it your no dummy. People are willing to pay big money for quality information that solves a problem. Content is king online and quality information is what people want. Maybe they are looking for some information on how to earn money online? How to get an ex girlfriend back? How to drive more traffic to your website, or blog? Self help information, Software, Language software or info, Green energy products, Sports. You name it Clickbank has it.

Digital products can be instantly delivered over the Internet after payment is successfully made. This is great for your customer. No waiting on shipment by mail, they get a quick fix instantly. After the product is ordered its delivered in literally nano seconds to your customer. Everyones happy!

**How Does This Benefit You As A Clickbank Affiliate Marketer?** You get your affiliate commission instantly and the vendor or owner of that product can pay his or her affiliates a lot more money. In fact up to an astounding 75% commission on the successful sale of an affiliate program. Why? After the initial program is created most of the revenue, or affiliate income generated by successful sales is pure profit. No shipping costs, overhead etc.... With digital products you can earn a lot more cash on each sale over physical products like Amazon for example. This savings is then passed on to you the online affiliate marketer.

Now You Dummies know the basics of affiliate marketing and Clickbank. Your next step is to go sign up for your free Clickbank account and start making some cash. **After you do this I promise to stop calling you a dummy!** Just kidding everyone, good luck with your new found affiliate marketing career.

## 10. Review Traffic Dashboard A Traffic Membership Site By Kim Roach

**Stressed Because Of Lack Of Traffic?**

[Review Traffic Dashboard A Traffic Membership Site By Blogger Kim Roach](#)

I just finished going through all the video's in Kim Roach's membership site [traffic dashboard](#). I bought the course yesterday so I could review it for my blog readers. Needless to say, its been a long day in a half so I can get this **review** to you as soon as possible.

First off I want to start off by saying there is a ton of information in Kim's traffic dashboard membership area. They are all videos which is nice. So you can listen to her traffic tips while your applying them to your Internet marketing campaigns at the same time. Listen, and work. Or just learn and watch Kim in action doing her thing driving traffic from all over the Internet using various

techniques.

Her voice is pleasant so it didn't hurt my ears listening to her traffic video's. Sorry all you **Fran Drescher** fans out there lol. There are 20 traffic techniques that **Kim** uses to drive traffic to her personal blog, and landing pages at <http://www.buzzblogger.com>. There is a sneak peak inside the traffic dashboard members area below.

I am a pretty experienced Internet and affiliate marketer. I have been doing Internet marketing for 4 plus years consistently now. Some of the stuff Kim teaches in her traffic videos I already knew about because I have been in the Internet marketing industry for some time now.

But if your just starting out in the Internet marketing field. Or you are fairly new on the various techniques used to draw traffic to your website, or blog than this course is a must have! Even an experienced Internet marketer does not know everything only **God** does. It was even worth the small investment to me because even though I am an experienced Internet marketer. I even learned some new traffic tips that I am gonna apply to add even more targeted traffic to this blog, and my various affiliate offers etc...

Traffic equals money online that is the cold hard truth! Without traffic your online business will be going nowhere fast. Learning new traffic techniques is gonna put more money in your pockets at the end of the day as long as you apply them as taught.

I especially enjoyed her video's on listbuilding and some of the traffic techniques she uses. I use a lot of the techniques she teaches and I can personally verify they work great. Kim Roaches 30 day traffic blitz video was another one of my personal favorites. Kim goes into great detail and shows you exactly what she would do if she had to start her email list over from scratch and add 3,000 subscribers in 30 days flat! Very cool video with some great info.

### **In Conclusion: Was Kim Roaches Traffic Dashboard A Good Buy?**

The cost to be a member of [traffic dashboard is only \\$39 dollars](#) and it is a one time payment not recurring. So 5 stars from me for the price of the video course and all the information that is available inside the members area.

The traffic strategies will work anywhere, and everywhere they are not obsolete. But you need content to apply to a lot of these strategies as Kim herself stresses. If you have a few good articles out there on the Internet, or maybe you have just started your first blog and you just need traffic to make some money. Than traffic dashboard will help you out a great deal.

If your an experienced Internet marketer you will have to decide for yourself if you want to part with your \$39 bucks. I myself found it worth it. But you may not depending on what exactly your looking for.

If your a beginner I would highly recommend you pay the \$39 dollars and become a member. This is a one time investment that can make you a lot of money if you apply Kim's traffic techniques to your Internet marketing campaigns.

Overall this was a good buy even for me. If your a beginner, or struggling with your traffic levels than the [traffic dashboard](#) will be a great buy for you. And Kim is even adding new things to her membership area in the near future. This will push the value up even more

**11. How To Write Faster More Effective Articles That Get High 70% Click Thru Rates**

[How to write faster more effective articles that get high 70% click thru rates](#)

If you dread the thought of writing article after article with no results. Then listen up [5 minute article](#) may be the best article learning program on the market today. And guess what else? It will only cost you \$4.97 that is it. I had to share the [5 minute article program](#) with my blog readers for one simple fact. It works plain and simple. And it is a very small investment under \$5 bucks. This online article writing program can make you money over and over again for years to come.

If your trying to earn cash through **affiliate marketing**. Article writing is a very important aspect for us Internet marketers for free, targeted traffic. If you are a blogger you need traffic, and backlinks. Article marketing can bring you both, and tons of it. But the problem we as article marketers have is that writing effective articles can be a very time consuming task to say the least.

But face the cold hard facts. Writing, and submitting articles to the major article directories like Ezinearticles.com and Articlesbase.com is perhaps the best free source of targeted traffic online. And if we are writing articles to earn money, like through the online affiliate marketing business model for example. We need to write articles effectively, faster, and get as many out there into cyberspace as possible. After all who wants to spend 2 hours writing an article that is not gonna get any click thru's? And is not gonna make you any money?

What If I told you I stumbled onto an effective way to learn how to write quality articles in 5 to 10 minutes. It also teaches you how to get a 30 to 70% click thru rate, how to bring hoards of targeted traffic to your articles, how to write a proper author bio box, how to raise your articles click thru rate, how to get instant approvals, and how to plan your article from start to finish by analyzing keywords from your competitors articles.

[5 minute articles](#) is a complete video course that will blow your socks off guaranteed. Why do I say this? I have tried it myself, and for under 5 bucks I was floored with the quality, and information that this program teaches you. It is a step by step full video course that teaches you all aspects of article marketing from start to finish. Every article marketer on this planet should purchase this course if they are writing a lot of articles with minimal results.

5 minute article is a complete A-Z article marketing course that will have you pumping out articles faster, with better quality, and up to an astounding 70% click thru rate. Grab your copy of [5 minute articles here](#), go through it, leave a review in my comments section below. If it not one of the best 5 dollars you have ever spent I will personally give you a full refund if you buy through my [link here](#).

## **12. Make Money Selling @ Dominating The Downloadable Video Game Industry**

---

**Make Money Selling Online Video Games This Guide Above Gives You All The Answers.**

### [Make Money Selling @ Dominating The Downloadable Video Game Industry](#)

**Headline:** [free report] Farmville made him \$1,272,129.82 on Clickbank!

He had no sales video...almost no upsells...YET he was able to generate over a one million dollars in sales in one year. [verifiable by Clickbank] Just 1 ebook in the gaming niche. In one narrow niche. It hit TOP Clickbank gravity at its peak.

Facebook users alone are playing popular video games like [Farmville](#), [WorldofWarcraft guides](#), [final fantasy 14](#), and many more of the **popular online video games** out there. The multi-billion dollar gaming niche is a lot less competitive like my niche which is internet marketing.

It is dog eat dog in the **internet marketing niche**. You really have to know what you are doing to make a considerable amount of money online. But it is my passion, and I enjoy giving you guys valuable **internet marketing tips**. So it is worth it to me. But let me be the first to say I have to work extremely hard to compete in the internet marketing niche.

With the downloadable video game industry it is wide open. There is tons of money to be made in this niche but you have to know how to do it. This is where a guide like CBGamers comes into play. It will show you how to dominate the online video game industry so you can put some easy money in your pockets. Let me remind you there are tons of buyers out there looking for online guides to get them ahead.

You do not have to be a rocket scientist to figure out that almost everyone young, and old plays video games. Take Facebook for example you already know how many people use this social networking site. Hell they made a movie about it. Which was very good by the way. How many of those Facebook members play Farmville? I will not discuss numbers, lets just say it is astronomical. Look at the video game niche in general. There are no internet marketing guru's out there to mess it up for you. Like in my niche the internet marketing niche. Highly competitive, and very saturated!But I enjoy it so what can i say.

It takes a whole lot of work to make it in the internet marketing niche, make money online niche, or affiliate marketing niche for that matter. You have to be a very good marketer to dominate this highly competitive niche. And you have to work a lot. Especially if you are a blogger like me to keep your edge in the **internet marketing field**. Not so with the **video game niche** you can make a lot of money selling guides, products, etc.... Based around some of the most popular video games online.

You have to follow the money. There is a reason the video gaming industry is worth billions. There is a huge demand for it. Video games in general are a great stress reliever, and can be very fun to play if its a good game.

Lets look at World of Warcraft for example. **Oh my God!** The sheer amount of people that play this game is frightening. Case in point: I have a friend who is married that works nights at a local auto factory on the line. He has 4 kids and you know what he does to relax when he gets home from a hard nights work? You guessed it he plays World of Warcraft and he talks about it non stop. This dude loves this game.

**World Of Warcraft** is like legal crack to many of its users they pay \$10 bucks a month just to play the game. You do not think a leveling guide based on the video game World Of Warcraft would be a hot seller? If you said no, get off the pipe! Take a look at Clickbank and see the gravity of some of these popular video game leveling guides. Gamers will pay to play as is evident in **World of Warcraft**. And they will pay big money to get that extra advantage in their favorite video game.

**Downloadable video game guides**, and actual video games themselves is a great niche to get into. The guide **Clickbank Gamers** will show you how to dominate the video game industry. It will give you very helpful tips to show you exactly what to do so you get the best chance possible to succeed in the lucrative video game niche. **Selling** these hot, how to downloadable E-book guides.

**If You Want To Learn How To Dominate, And Make Money In The Hot Billion Dollar Gaming Niche I Would Highly Suggest You Click On The Link Below!**

**13. Alexa Sneaky Backlink Trick To Compete With Your Competitors In The SEO War!**

---

[Proven Keywords To Dominate The Serps Click Here!](#)

### [Alexa Sneaky Backlink Trick To Compete With Your Competitors In The SEO War!](#)

**Backlinks, Backlinks, Backlinks,** Keyword research, and optimizing your blog, or Websites content with the keywords you are going after will eventually grab you top rankings in the serps. Or search engine ranking positioning for you newbies out there reading this blog post.

I am assuming you are trying to rank on the first pages of the major search engines like Google, Yahoo, and Bing for the keywords you are targeting so you can earn more money online right? Kind of a No – Brainer free search engine traffic is the best kind of traffic that we as Internet marketers can get online.

It is free which is the best part. It is extremely targeted to what you are selling because keywords are what your blog, or Website is essentially about. **Seo** in general is highly effective and can make you a lot of **money** if you do it right. But the downfall depending on your niche is that it can also be highly competitive so you need all the advantages you can get to compete in the **Seo** wars and come out smelling like roses in the end.

**Cool Fact:** Did you know that 90% of all online searchers click on the free organic listings when performing a search online over the paid pay per click listings found on the right hand side of the page when performing an online search? Take advantage of this by doing your keyword research, and optimizing your sites content for the search engines effectively for an effective **Seo** strategy.

### [Alexa Sneaky Backlink Trick To Compete With Your Competitors In The SEO War!](#)

Once you find a general theme for your Website, or Blog and you have written down a list of 4-5 keyword phrases to target. Then you are gonna want to optimize your sites content for the search engines, and build some quality relevant backlinks for starters.

Here is a cool video I put together for you guys and girls that will help you find a lot of quality relevant backlinks related to the niche that you are in, so your site can gain a better ranking in the search engines over time, and **earn** you more **money** from your online efforts. Take the keywords that you are thinking about going after and perform a Google search. You see the number 1 Websites on the first page for that particular keyword phrase?

**Now the fun part!** Copy the Websites URL and go to **Alexa** and see what websites are linking to them. There should be a few pages of links for that particular Website. Now link to these Websites yourself by going through the sites that are linking to them one by one and adding your blog, or Websites URL to them. Every one of these links will be a quality backlink, because Alexa only uses quality backlinks from reputable sites.

After you are done with that particular site, go to the next site on the first page of Google for the

keyword phrase that you are targeting. Add your Url to all there backlinks. Move onto your next site on the first page of Google so on and so forth. Rinse, wash, and repeat!

For full step by step directions I show you how to use **Alexa** for getting quality backlinks in the **video** directly below! Sit back, watch, and enjoy! And your comments are always appreciated. Leave one below this video for a nice backlinks from this money making blog.
